

Growth-as-a-Service® (GaaS) | HITSERIES®

In Japan, there is \$839 billion dollars for 5 year R&D. If asset turnover ratio is 100%, then \$800 billion GDP should be generated but GDP is still same as 20 years ago in Japan. United States have 2.8 Trillion in R&D and gain near 3 trillion GDP growth in five years. This gap between US and Japan is our opportunity. Unmigrated \$800 billion R&D is our future revenue we value at.

“How innovation occurs and distributed in matured countries”

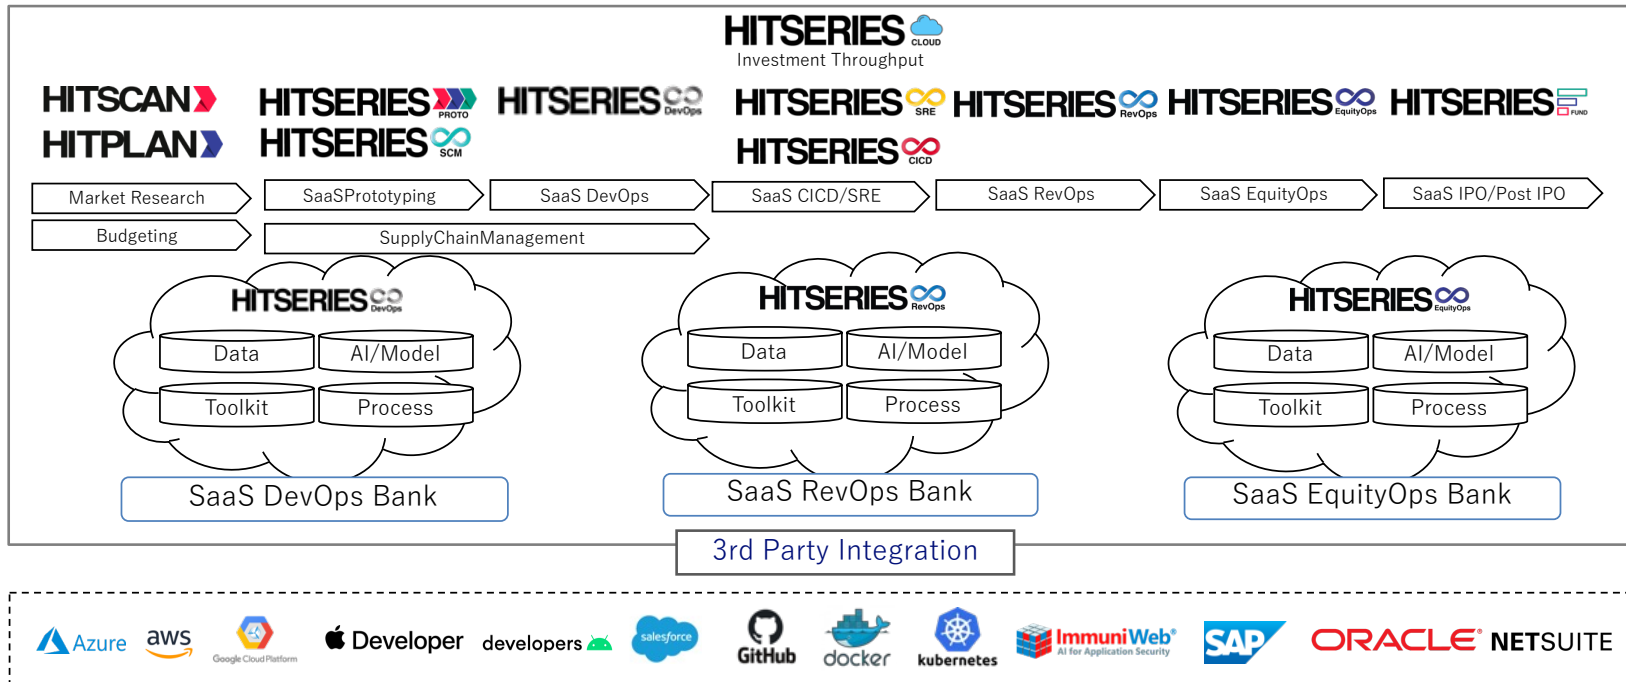

- People bet on technologies for the future using two pathways: Internal R&D and External Venture Capital
- R&D is not the game of averages, but the game of exceptional. Top 10% generate 90% of the value
- Outsiders acquire technologies and generate extraordinary returns - Tesla, Amazon, Apple...

**TANAARK is growth-as-a-service model provider.
We bring a differentiated view of innovation to Japan.**

Growth-as-a-Service®

Finding growth options / leverageable technology assets

Growth-as-a-Service model aggregating multiple technologies

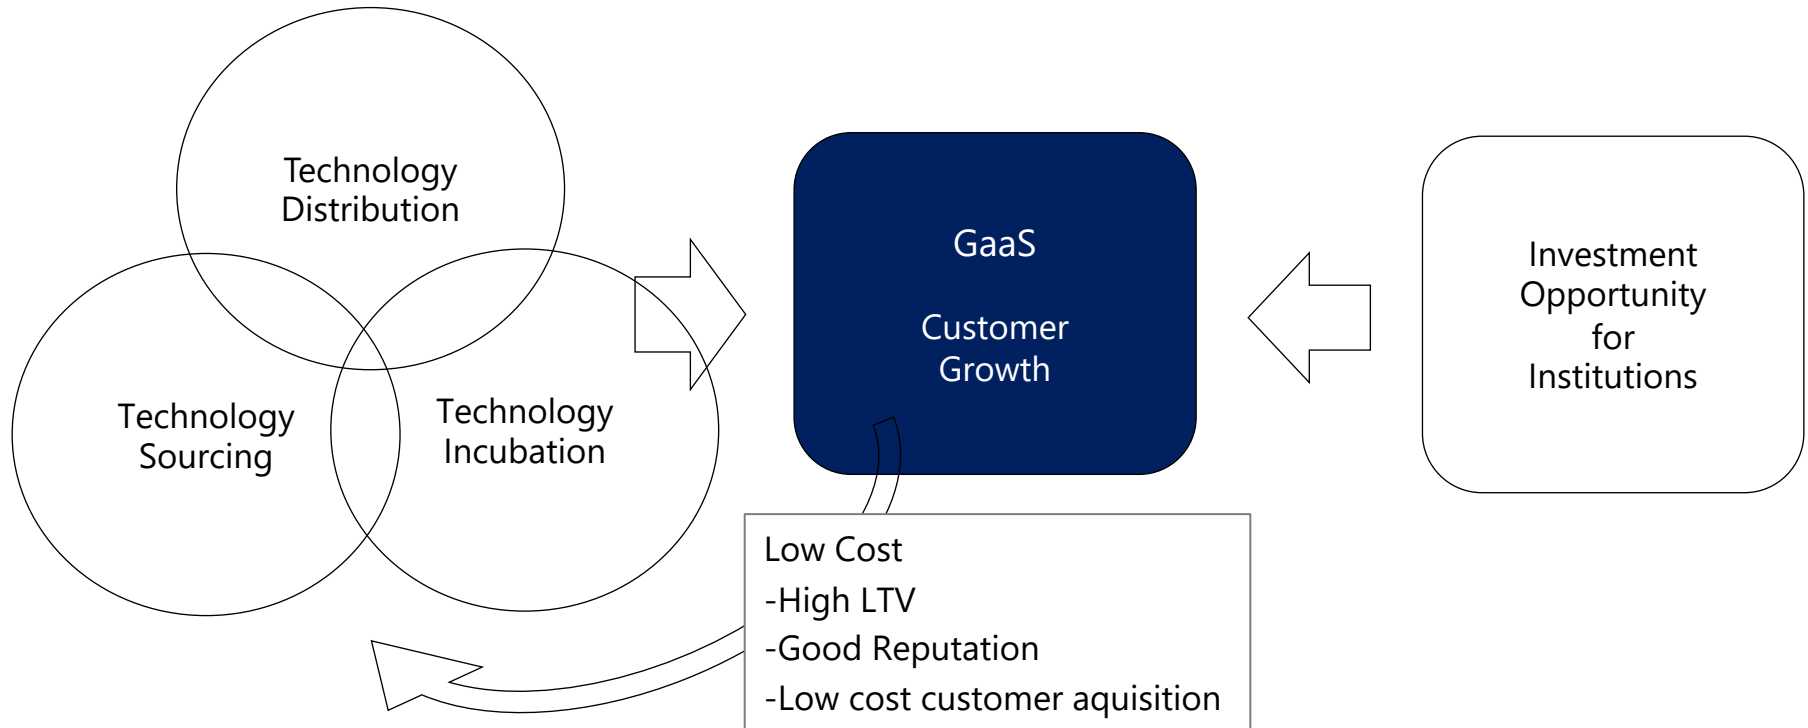

- Fortune Global 500 investment managers have problem in migrating R&D investment into recurring revenues
- TANAAKK have capability for technology sourcing, incubation and distribution.
- TANAAKK will be go-to-market agent for tech distribution in Japan

VALUE ecosystem

Shareholders' value growth

Value opportunity

GRO-SERIES generates \$10 clients ARR per TANAAKK \$1 ARR
usually win the competition in Japan with tech giants in terms of SaaS new business area.

- BIG 4 (Deloitte, PwC)
- Consulting (McKinsey, Accenture)
- IT Giants (IBM, NTT, Fujitsu, Hitachi, Toshiba)

Start small, Grow big
